[ stones add soul to décor ]

## [ Brand Story ]

With 5 naturally-blessed quarries, 6 factories—one being India's largest, and a thoughtful team of 250, we are the go-to place of natural stones for architects, designers, estate developers, and home-dwellers from around the world.

From States and Canada to across the Atlantic in the UK, Ireland, France, more of Europe, to somewhere as far as Australia, we have our pugmarks almost everywhere you can think of. This has not only earned SKYZ a Star Export House rank by the Indian government but the relations and exposure has also opened doors for us to curate and bring to India, a heart-hitting range of natural stones from some of the best quarries of the world.

Our process is simple – Use 25 years of experience, skills, and connections, then travel and meet world-renowned experts and manufacturers, personally visit quarries and factories and keep adding to our natural-stone connoisseurship.

Today, we are as much of curators and importers as we are manufacturers but at heart, we are still the admirers of details. We are always in awe when we come across a beautiful natural stone – even if it's just a piece of marble, a granite countertop or a sandstone tile in the patio. When we look at the veins, the tones, the swirls – we feel stones add soul to décor. It is this wonderment that takes us places and brings us back with unique natural stone finds. With quality as its heart and a thoughtful work-ethic, SKYZ blurs the line between India and the world while beautifying spaces globally, one stone at a time.

At SKYZ, we function as a large family where each individual comes along with a unique skill-set and expertise. It's our team's culture and love for new ideas that gives us an edge and helps us live up to our words.

**5 Factories** spread over  
5,00,000 sqft in north and south of India

## [ Infrastructure ]

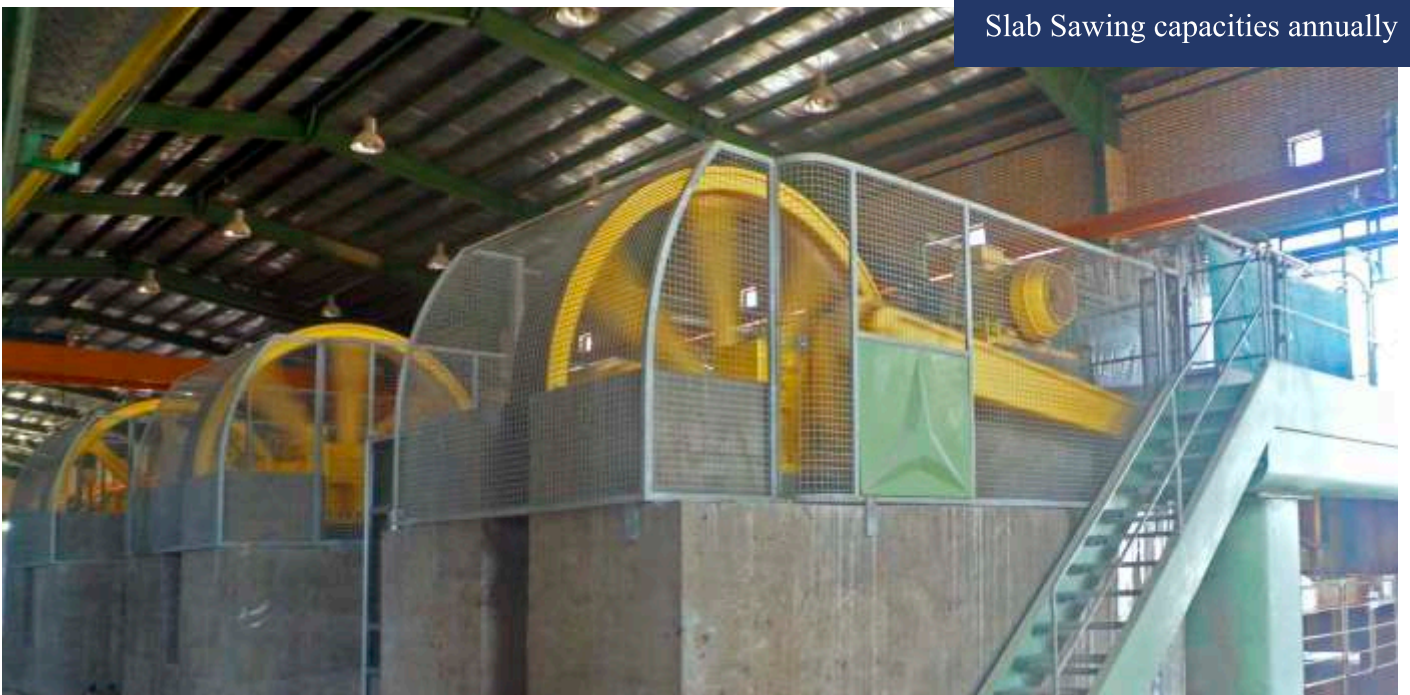

Over **7 million Sqft.**  
Cut to size production annually

It's the World's best selling stone for a reason – quarried from ancient hot mineral springs, mostly in Iran and Turkey, this exquisite piece of nature's art is a story in itself. Apt for those who like to have conversations about their décor, travertine can add that old-world charm inside and out.

Onyx shows us how creative Mother Nature can be. This see-through luxury stone is earthy and otherworldly at the same time. We travel the world and pick ours for you by looking at the stone's fine grains and many veins. You can back-lit these to add a whole new dimension to the setting.

Some of the natural veins of our Granite stones will remind you of Vincent Van Gogh's paintings. The rich colour palette coupled with a scratch and chip resistant nature makes it a superstone, perfect for both interiors and exteriors.
